

College of Pharmacy
Statement of support for the Continuous Enrollment Policy for Ph.D. Students
Frank J. Ascione, Pharm.D., MPH, Ph.D.
Dean and Professor of Social and Administrative Sciences

It is quite clear that the continuous enrollment policy will have a positive effect across campus as it will restore a sense of connection to previously un-enrolled students without imposing any additional financial burden. The College of Pharmacy is already in compliance with this policy and we strongly support it.
